1 Standard L^AT_EX Article

This document illustrates the appearance of an article created with the shell **Standard L^AT_EX Article** or the shell **Blank - Standard L^AT_EX Article**. Both shells produce documents with centered title information, left-justified headings, theorem environments, and appendices. Throughout out document we insert citation from any database we are going to interrogate in the BibTeX grey box at the end... such as [?], [?] and later [?] or [?].

The standard L^AT_EX shells provide the most general and portable set of document features. You can achieve almost any typesetting effect by beginning with a standard shell and adding L^AT_EX packages as necessary.

The document class base file for this shell is `article.cls`.
